RESEARCH EXPERIENCES

Collaboration with Oxford Robotics Institute (ORI), Oxford, UK *Jan. 2024 - Apr. 2024*
- Proposed an adapter-based reinforcement learning (RL) method for generalizing learned skills from a disembodied hand to various whole-body robots, such as A2Single, Aliengo-Z1, and Toyota HSR.
- Integrated adapter techniques that are LoRA and Residual Adapter into robotic RL and introduced a feedback reward from robotic control, showing the effectiveness of cross-embodiment generalization.
- Submitted a paper to IROS 2024 (my role: first author).

Visiting Scholar at vLAR lab, PolyU, Hong Kong, China *Mar. 2022 - Oct. 2022*
- Proposed a skill learning method for generalizable manipulation of various 3D articulated objects (SAPIEN).
- Proposed a prediction-based RL approach for dynamic catching with a mobile robotic manipulator (Isaac Gym).
- Published a paper in ICRA 2023 and a paper in ICRA 2024 (oral presentation, my role: first author).

Bachelor Thesis at Robot Locomotion Lab, Tsinghua University, Beijing, China *Dec. 2019 - Jul. 2020*
- Developed a quadratic programming (QP) based whole-body control (WBC) method for humanoid robots.
- Applied the method to adult-size torque-control Humanoid Robot Tsinghua Walker, realizing balancing, dancing, and ball kicking (my role: thesis author).

Research Intern at IML Lab, Duke & UIUC, Durham & Champaign, USA *Jul. 2019 - Sep. 2019*
The IML Lab was transitioned from Duke University to UIUC during my internship.
- **UIUC, Champaign, USA:** Developed a semi-empirical method for simulating contact with elastically deformable objects and co-authored a paper published in ICRA 2020. *Aug. 2019 - Sep. 2019.*
- **Duke University, Durham, USA:** Collected and analyzed data on the robotic poking of heterogeneous elastic objects using various probes. *Jul. 2019 - Aug. 2019.*

Tsinghua Team Member in RoboCup 2019 Humanoid League, Sydney, Australia *Sep. 2018 - Jul. 2019*
- Won the 2nd place in Technical Challenge and Drop-in Contest, the 3rd place in 2v2 Soccer Competition.
- Applied segmentation and particle filter algorithm for vision-based localization (my role: main developer).

Research Assistant at State Key Lab in CS, Tsinghua University, Beijing, China *Apr. 2017 - Jun. 2019*
- Proposed an active robot-picking algorithm using deep reinforcement learning to facilitate the robot actively exploring the environment and picking objects. Published a paper in IROS 2019 (my role: co-first author).
